2

Docket No.: 08212/0200293-US0

AMENDMENTS TO THE SPECIFICATION

Please amend page 11, in the second full paragraph, at line 13 of the specification as indicated below:

FIG. 1C illustrates data packet flow from the MN to the CN, in accordance with aspects of the invention. Original Packet 201 is analogous to the original packet in the previous example, except the address information is reversed because the packet is traveling in the opposite direction. After creating original packet 201 the mobile node performs IPsec encryption and addressed the encrypted VPN packet [[211]] 221 to the VPN. Again, the contents are analogous to the contents of the VPN packet from the previous example.
